

TECHNICAL RIDER

"L'ASCESA"

With and by: Juriy Longhi

Directed by: Philip Radice and Domenico Lannutti

Description:

A guru, great divine master. A follower, his faithful disciple.
The spiritual growth of man towards a new consciousness, seeking the definitive and true enlightenment...a travel through circus, physical theatre and mental states!

Duration:

About forty minutes.

Preparation time:

Assembling: about thirty minutes; disassembling: about twenty minutes.

Technical requirements:

It's needed a minimum space of 9x5 meters, in order to assemble the slack-rope structure reproduced below; it must be hooked onto two hooking points on the ground level, with a distance of about 10 meters (minimum 9 maximum 20) and a resistance of about 350Kg (for example: lamp-posts, columns, traffic lights, road signs, cement benches, trees, iron bars planted in the ground, wall plugs fixed on the walls or on the stage, cement blocks with hooking ring, big plastic boxes filled with water or sand etc...). Minimum height required: 4 meters.

A socket is needed in order to power lights and PA system.
